SUMMARY

Backend-focused Software Engineer with **2+ years of experience** building scalable, high-volume systems serving millions of users. Experienced in **Node.js, PHP, REST APIs, MySQL, Redis, AWS and asynchronous processing**, with hands-on expertise in **API design, microservices, job queues, RBAC, caching, security and performance optimization**. Built production systems including a **3M+ daily email pipeline** and an enterprise-grade **multi-channel emergency notification platform**.

WORK EXPERIENCE

JUNIOR DEVELOPER — FEEDSPOT **Sep'24 - Present**

- Developed and scaled high-traffic backend systems supporting millions of users, including Feedspot Reader, Email Digest, Teams, Widgets, RSS Builder and RSS Generator.
- Optimized REST APIs and Redis caching, reducing API latency by **25–30%** and database load by **~35%** during peak traffic.
- Scaled the Email Digest pipeline to **3M+ daily sends**; optimized the SES microservice to reduce failures by **40%** and implemented click tracking, auto-login and conversion flows.
- Built the **Teams module** with RBAC-based permissions, content sharing, folders/pinboards and team-specific digest delivery.
- Built RSS generation systems for websites and social platforms using **Puppeteer, Bright Data, Redis and MySQL**, handling scraping, rate limits, scheduling and Reader integration.

TECHNICAL SKILLS

Languages: PHP, Python, SQL, JavaScript, HTML, CSS
Backend: Node.js, Express.js**,** REST APIs, Microservices,BullMQ, RBAC, JWT, Authentication & Authorization, Web Scraping
Database & Cache: MySQL, Redis, Database Optimization, Caching
Cloud & Security: AWS, AWS KMS, Amazon SES, Encryption, bcrypt, Rate Limiting
Tools & Testing: Git, GitHub, GitHub Actions, CI/CD, Zod, Jest, Supertest, Puppeteer, Bright Data, PHPMailer
Core: Data Structures & Algorithms, OOP, DBMS, SDLC, System Design, Performance Optimization

PROJECTS

ENTERPRISE EMERGENCY ALERT SYSTEM — Node.js | Express.js | MySQL | Redis | BullMQ | AWS KMS **Completed**

- Engineered an enterprise-grade **multi-channel emergency notification backend** supporting Email, SMS, WhatsApp, Voice and Push alerts with one/two-way responses, dynamic employee targeting and **BullMQ-based asynchronous dispatch with retries, delivery tracking and per-channel audit logs** for reliable alert delivery.
- Designed secure and scalable employee management with **logic-based groups, RBAC, async Excel bulk imports and automated contact reviews**; protected sensitive PII using **AWS KMS envelope encryption** and implemented Redis caching, JWT authentication, Zod validation and background workers.

EMAIL DIGEST SYSTEM (Millions of Daily Sends) — PHP | MySQL | PHPMailer | AWS SES | Redis **Ongoing**

- Engineered scalable email delivery and Reader backend workflows with caching, tracking, auto-login and analytics for **millions of users and 3M+ daily emails**.
- Improved system reliability and performance through Redis caching, API/query optimization and SES delivery improvements, reducing sending failures by **40%**.

RSS BUILDER & GENERATOR — PHP | Redis | Puppeteer | MySQL | Bright Data **Ongoing**

- Designed end-to-end pipelines that transform website HTML and Instagram, LinkedIn and X/Twitter content into structured RSS feeds using DOM extraction and automated scraping.
- Implemented Redis-backed job scheduling, rate-limit handling, anti-bot workflows and platform-specific data extraction; integrated generated feeds with Feedspot Reader.

EDUCATION

B.E. in Electronics & Telecommunication Engineering — University of Mumbai | 2020–2024 | **CGPA: 9.41**
HSC — Annasaheb Vartak College | 68.15%
SSC — Rajguru H. M. Pandit Vidyalaya | **94.60%**

ACHIEVEMENTS

LeetCode | RATING 1825 | Global rank **1024/25K+** in Weekly Contest 368

GeeksforGeeks | Institute Rank **#1** | Coding score **2000+**
